

DANCE FLOOR SIZES

To select the size of the dance floor for your wedding or special event, you will need to know the total number of guests expected at the event. A good rule of thumb for determining the dance floor size needed is only 30% - 50% of the total number of guests will be on the dance floor at any given time.

With that in mind, once the percentage of the total guest count is calculated, multiply that number by 4.5 sq. ft., which is the average space a dancer needs. Now find your number of dancers (or close to it) on the chart to determine the size of your dance floor.

Our highly skilled team will handle all tasks related to delivery, assembly, breakdown, and removal, leaving you with more time to enjoy the more important details of your big day!
